

About

After having had a year of design experience all around China, I got back to the Netherlands, graduated and worked for Kummer & Herrman and Foam Lab as a graphic designer. Throughout my career and 8 years of design education I have gained a wide variety of experiences and interests in a broad range of disciplines and worlds, whilst still being able to approach and connect everything with graphic design.

Graphic design, book design, exhibition design, art-direction, advertising, branding and marketing are part of my experience and interest.

To read reference letters by Michiel Schuurman, Simona Kicurocska, Guanru Li and Rutger Prins, you can by sending me an e-mail.
